BOROUGH OF ASHTON-UNDER-LYNE

Annual Report
of the Medical Officer
of Health

For the Year 1946

Borough of Ashton-under-Lyne

1946

PUBLIC HEALTH COMMITTEE

Chairman: Alderman Flowers, J.P.

Deputy-Chairman: Alderman Sheard, J.P.

The Mayor, Aldermen Arnold and Massey, J.P., Councillors
Gantley, Hannan, Ibbotson, MacCormack, Mamourian, J.P.,
and Oldham.

MATERNITY AND CHILD WELFARE COMMITTEE

Chairman: Councillor Farley.

Deputy-Chairman: Councillor Mrs. Mamourian, J.P.

The Mayor, Aldermen Arnold and Flowers, J.P., Councillors
Hall, Hannan, MacCormack, Oldham and Sidebottom.

TOWN HALL CHAMBERS,
ASHTON-UNDER-LYNE.

TO THE MAYOR AND COUNCIL OF THE BOROUGH OF
ASHTON-UNDER-LYNE.

MR. MAYOR, MR. CHAIRMAN, LADIES AND GENTLEMEN,

I beg to submit my report on the health of the Borough for the year 1946.

A brief résumé of the vital statistics gives encouraging reading in so far as they are barometers of the communal health. A rapidly rising birth-rate, a slightly falling death-rate, a diminishing death-rate from Tuberculosis and Cancer, coupled with a substantial fall in the maternal mortality rate, are all on the credit side, whilst the infantile mortality rate alone has not shown a diminution, though it has decreased in comparison with the previous five-year period. Furthermore, there have been no epidemics during the year, and the incidence of Diphtheria has been less than half what it was in 1945.

The work of the Health Visitors has been carried out during the year, whilst attendances at the various Welfare Centres show no diminution.

A post-war feature has appeared under the ægis of the Maternity and Child Welfare Department which was "born of necessity" out of the employment of women in war work, namely, Day Nurseries.

It is hoped that the conditions which brought these into existence will soon pass away and render their continuance unnecessary.

Protection against Diphtheria, whilst making slow progress at our clinics, might be hastened were more carried out by their private doctors.

The total percentage of the child population aged 0—15 years is 58 per cent.

It need hardly be mentioned in this place that the most urgent health measure in the town is the provision of more houses and the eradication of much slum property.

The next most urgent environmental problem is the eradication of the smoke menace in this area.

Commending this report to your notice,

I have the honour to be

Your obedient servant,

ALAN S. SIMPSON,

Medical Officer of Health.

Staff of the Health Department

MEDICAL.

Alan S. Simpson, M.B., B.S. (Lond.), M.R.C.S., D.P.H.,
Medical Officer of Health, School Medical Officer,
Maternity and Child Welfare Officer.

Mary Evans, M.B., Ch.B., D.P.H., Assistant Medical Officer
of Health and School Medical Officer.

SANITARY INSPECTORS.

C. Sykes Handforth, M.S.I.A., C.R.S.I., M.Inst.P.C., Chief
Sanitary Inspector, Inspector of Meat and Other Foods,
etc.

Herbert Hunter, M.S.I.A., C.R.S.I., Deputy Chief Sanitary
Inspector, Inspector of Meats and Other Foods, etc.

C. F. Spencer, M.S.I.A., C.R.S.I., Additional Sanitary
Inspector, Inspector of Meats and Other Foods, etc.

HEALTH VISITORS.

Nurse Chamberlain, S.R.N., S.C.M., H.V. Cert. (Senior
Nurse).

„ Weir, S.R.N., S.C.M., H.V. Cert.

„ Cleary, S.R.N., S.C.M., H.V. Cert.

„ Schofield, S.R.N., S.C.M., H.V. Cert. (Resigned
March, 1946).

„ Wrigley, S.R.N., S.C.M., H.V. Cert.

„ Edwards, S.R.N., S.C.M., H.V. Cert.

„ Malone, S.R.N., S.C.M., H.V. Cert.

CLERKS.

C. Sharples, A. Hartley (Resigned November, 1946),

E. McCabe, F. Gartside, B. Wood.

Ashton-under-Lyne Borough:

EXTRACTS FROM VITAL STATISTICS, 1946

Population—		Per 1,000 of estimated Population			Maternal Mortality Rate			Rate of

Ashton-under-Lyne Public Health AMBULANCE DEPARTMENT

ANNUAL REPORT

I have pleasure in submitting to you my first Annual Report of the working of the Ambulance Department for the period 1st April, 1946 (when the department was taken over by the Health Committee) to the 31st December, 1946.

3,680 calls were received and responded to, as against 3,275 in the corresponding nine months of 1945, an increase of 405 calls. The increase in the number of calls received from the area which this Service covers, is actually greater than the 405 shown above, as it will be seen on examination of the figures below that in 1945, 40 calls were received from the adjacent Ambulance Services of Stalybridge, Hyde and Mossley, whereas in 1946 only one request for assistance was received from Hyde; in addition 95 Police duty calls are shown for 1945 and none for 1946. The 3,680 calls received are classified as follows:—

Nature of Case.	1946.	1945.	Local Authority.	1946.	1945.
Private Removals	3,231...	2,761	Ashton Borough ...	1,846...	1,863
Road Accidents	79...	56	Droylsden U.D.C. ...	703...	622
Works Accidents	87...	69	Audenshaw U.D.C. ...	813...	521
Domestic Accidents ...	120...	135	Limchurst R.D.C. ...	259...	187
Medical Emergencies ...	126...	79	Mr. Watts C. Hosp'l	30...	64
Bodies to Mortuary ...	36...	40	Lanes. P.A.C.	23...	16
Stalyb'dge Amb. Service	— ...	37	L.C.C. T.B. Dispen'y	6...	2
Mossley Amb. Service ..	— ...	2			
Hyde Amb. Service	1...	1			
Police Duty Calls	— ...	95			
	<hr/>	<hr/>		<hr/>	<hr/>
	3,680...	3,275		3,680...	3,275

It will be noticed from the figures above that there is a slight decrease in the number of calls received from within the Borough, whereas Droylsden shows an increase of 81, Audenshaw 292 and Waterloo 72. No births occurred in an ambulance, but one patient died in an ambulance in the month of April, 1946.

AMBULANCES

At the time of writing this report, five ambulances are in use—two Humbers and three Austins. The Humbers were first registered in May, 1935, and two of the Austins in May, 1938, the two Austins being in fair condition. The fifth ambulance now in

use is a new Austin, the body being built on a 2-ton chassis. A second Austin is at present being built by the same firm, Messrs. H. Lomas, Ltd., of Manchester, and delivery of this vehicle is expected before the end of March, 1947.

The two Humber Ambulances are now nearing the end of their use as ambulances, being very unreliable, and I would recommend that when the second new ambulance has been delivered these should be disposed of.

MILEAGE

The total mileage covered during the nine months under review was 25,802 as against 21,283 in the corresponding period of 1945, an increase of 4,519.

The respective mileage for each vehicle is as follows:—

Humber A.T.B.47	7,564
Humber A.T.B.48	12,299
Austin D.T.B.219	2,980
Austin D.T.B.220	1,755
Austin G.T.F.435	1,204

The total mileage for each vehicle since first registered:—

Humber A.T.B.47	72,134
Humber A.T.B.48	69,254
Austin D.T.B.219	35,902
Austin D.T.B.220	69,951
Austin G.T.F.435	1,385

PETROL AND OIL

2,846 gallons of petrol were consumed for an average of 9.06 miles per gallon.

50 gallons of oil were consumed for an average of 516 miles per gallon.

GARAGE AND HEADQUARTERS

The ambulances are garaged in the Trolley Bus Bay at the Passenger Transport Depot, Mossley Road. The garage accommodation and the facilities, together with the office headquarters and their close proximity to the local Hospitals, make this an ideal position for an Ambulance Station.

I would like to thank Mr. Crossley, the General Manager, and his Staff for the valuable assistance given to this department, as all the repair work requiring expert mechanics has been done by his repair staff, especially in such difficult times when, due to the vehicles being obsolete models, his staff have had to make spare parts, which have been unobtainable from the manufacturers.

PERSONNEL

The department is staffed by one Superintendent and 14 Driver Attendants—11 males and 3 females. One female, Miss J. Taylor, resigned during the period and her place was filled by a male.

Eleven of the staff have been fitted out with a very neat uniform, together with a greatcoat and raincoat, and measurements have been taken for the remaining members of the staff, and delivery is expected within the next month or so.

Four shifts are worked over the period of 24 hours: 6 a.m. to 2 p.m., 2 p.m. to 10 p.m., 6 p.m. to 2 a.m., 10 p.m. to 6 a.m.; also a day shift from 9 a.m. to 5 p.m., which is the peak period.

The number of drivers on duty during the various periods of the 24 hours—6 a.m. one day to 6 a.m. the next day—is as follows:—

6 a.m. to 9 a.m.	...	3 Drivers	(2 men and 1 woman)
9 a.m. to 6 p.m.	...	6 "	(4 men and 2 women)
6 p.m. to 10 p.m.	...	4 "	(3 men and 1 woman)
10 p.m. to 2 a.m.	...	3 "	(3 men)
2 a.m. to 6 a.m.	...	2 "	(2 men)

SICKNESS

During the nine months under review, 77 working days have been lost by members of the staff through sickness, for which wages were paid for 42 days at full pay and 21 days at half-pay. No wages were paid for the remaining 14 days. Miss Stelfox has been absent for 66 of the 77 days, and at the time of writing this report she is still on the sick list on half-pay.

The amount of sickness compares very unfavourably with the corresponding period of 1945, as during that time not one day was lost by any member of the staff through sickness.

FIRST-AID QUALIFICATIONS

Eight members hold the First-Aid Certificate of the St. John Ambulance Association; the remaining seven members are at present taking a course of First-Aid, and the examinations are expected to be held in about a month's time.

1946

Notification of Births

(Public Health Act, 1936, Section 203).

The Act requires that all births occurring in the area of Ashton-under-Lyne (after the 28th week of pregnancy, whether alive or still) shall be sent to the Medical Officer of Health within 36 hours of the birth. All births occurring within the area are, therefore, notified to me whether the parent is a resident or a non-resident of Ashton-under-Lyne.

				Total Notified.	Ashton Residents
Number of Live Births...	Notified	Male ... 1193 Female ... 1060		2253	891
Number of Still Births ...	Notified	Male ... 32 Female ... 30		62	27

By Institutions:—

	Nursing Homes	40
	Midwives	266
	Doctors	2
				<hr/> 2315 <hr/>

Notifications received by Department included above, but transferred elsewhere 1397

Total Notified Births allocated to Ashton-under Lyne ... 918

Percentage of Total Notified Births (Live and Still) received from ...	(a) Institutions & Nursing Homes ...	88.423%
	(b) Municipal Midwives ...	11.490%
	(c) Doctors087%

MIDWIVES PRACTISING IN THE AREA.

There were five midwives practising in the area during 1946, and all five were Municipal Midwives appointed by the Lancashire County Council.

MATERNAL MORTALITY.

ASHTON-UNDER-LYNE.

Maternal Mortality Rate (per 1,000 Total Births i.e., Live and Still).	Puerperal Sepsis 1.09
	Other Puerperal Causes ... Nil.
	<hr/> 1.09 <hr/>

ANTE-NATAL CLINIC.

This Clinic is held every Friday afternoon, one week at Enville House Centre and the following week at Richmond Street Centre.

Fifty-two sessions were held during 1946, and 148 expectant mothers made 756 attendances.

An increasing number of patients now enter Hospitals and Maternity Homes for their confinements. Many of these do not attend the Borough Ante-Natal Clinic, but prefer to make private arrangements with the family doctor and hospital.

POST-NATAL CLINICS.

This Clinic is held on the first Monday afternoon in the month at Enville House Centre. There were 5 sessions in the year, and the number of patients who attended was 27.

SUPPLY OF TRANSFUSION FLUIDS FOR MATERNITY CASES.

Arrangements were made with the Blood Transfusion Officer for the Supply of Transfusion Services in certain obstetric emergencies. Any doctor practising in the area requiring transfusion fluids for a maternity case has been advised to communicate with Dr. Thomas, the Obstetric Consultant appointed for the Borough. Dr. Thomas is also the Medical Superintendent of the Lake Hospital and has immediate access day and night to their blood bank.

Day Nurseries and Nursery Classes

There are two Day Nurseries and three Nursery Classes in the Borough, and the following Table shows the accommodation provided, hours of opening, etc.

Day Nurseries:

Location.	Date opened.	Numbers accommodated	Ages accepted.	Hours of opening.	Average daily attendance.
1. West End ... Council School	2/2/42	... 45 ...	1 to 5 years...	Mon to Fri. ... 7 a.m. to 7 p.m. Saturdays 7 a.m. to 2 p.m.	... 41
2. St. John's ... School, Hurst	1/11/42	... 32 ...	1 to 5 years...	Mon to Fri. ... 6-30 a.m. to 6-30 p.m. Saturdays 7 a.m. to 1 p.m.	... 27

Nursery Classes:

1. Parochial ... School.	5/5/44	... 30 ...	2 to 5 years...	Mon. to Fri. ... 7 a.m. to 7 p.m. Saturdays 7 a.m. to 1 p.m.	... 20
2. Trafalgar ... School.	3/7/43	... 30 ...	2 to 5 years...	Mon. to Fri. ... 7 a.m. to 7 p.m. Saturdays 7 a.m. to 1 p.m.	... 20
3. Elgin Street ... School.	7/8/43	... 30 ...	2 to 5 years...	Mon. to Fri. ... 7 a.m. to 7 p.m. Saturdays 7 a.m. to 1 p.m.	... 17

	—	Total accommod't'n provided	167		Total average attendance	... 125	—
--	---	-----------------------------	-----	--	--------------------------	---------	---

INFANT MORTALITY

The causes of the 41 deaths were as follows:—

Measles	1
Pneumonia (all forms)	8
Premature Birth	13
Congenital Malformation	6
Suffocation (overlying)	1
Other Causes	4
Enteritis	2
Atrophy, Debility and Marasmus	5
Injury at Birth	1
	—
	41
	—

Child Welfare Centres

The work at the Infant Welfare Centres was well maintained during 1946, and the following figures show the number of sessions held, the number of consultations and the weighings carried out at the Centres:—

Consultations held	115
Attendances at Consultations	1851
Number of Weighings of Children	8208

Total number of attendances at all Centres during the year:

(1) By Children under 1 year of age	7300
(2) By Children between the ages of 1 and 5	1585

Total number of children who attended at the Centres during the year and who, on the date of their first attendance, were:—

(1) Under 1 year of age	510
Percentage of notified live births represented by this figure	57%
(2) Between the ages of 1 and 5 years	70

Total number of children who attended at the Centres during the year and who, at the end of the year, were:—

- | | |
|--|-----|
| (1) Under 1 year of age | 439 |
| (2) Between the ages of 1 and 5 years | 461 |

The fact that 57% of the total notified births are brought to the Welfare Centres is an indication that the work is of value and appreciated by the parents.

Provision of Dried Milk

During 1946, 11,195 packets of dried milk were sold at the Centres.

106 were sold at half-price and 627 were provided free, in accordance with the income scale adopted.

The net cost to the Council amounted to £24 18s. 2d.

Orthopædic Treatment

Number of individual pre-school children attending Clinic 119.

A classification of the conditions for which the above 119 children were treated is set out below:—

- | | |
|------------------------------------|----|
| 1. Rickets | 2 |
| 2. Genu-Valgum (Knock-knee) | 43 |
| 3. Genu-Varum (Bow-leg) | 2 |
| 4. Torticollis (Wry-neck) | 11 |
| 5. Infantile Paralysis | 1 |
| 6. Spina Bifida | 1 |
| 7. Flat Feet... .. | 31 |
| 8. Postural Deformities | 2 |
| 9. Curly Toes | 6 |
| 10. Unclassified | 20 |

119

Artificial Sunlight Clinic

1946

Eighty-seven children made 1,580 attendances.

Adoption

The Adoption of Children (Regulation) Act, 1939, came into force on 1st June, 1943. A Register is now kept of the children adopted and they are regularly visited by the Health Visitors.

HOME HELPS.

Attempts were again made during the year to develop the Home Helps Scheme. There was difficulty in getting suitable women as Home Helps.

Arrangements have been made with the local office of the Ministry of Labour and National Service whereby, if there is a demand for a Home Help, the Exchange is to be notified by the Medical Officer of Health and an effort made to find a suitable person.

ATTEMPTS TO IMPROVE THE GENERAL STANDARD OF CLEANLINESS AND HABITS AND TO COMBAT INFESTATION BY HEAD-LICE.

In accordance with suggestions from the Ministry of Health, steps were taken to improve the general standard of cleanliness in children under 5 years.

The Nurses have made early morning and late evening visits to the homes. Lethane Hair Oil has been advised in the treatment of head vermin. Where necessary, action was taken under the Scabies Order, 1941.

The Health Visitors, who are also the School Nurses, now undertake the treatment of Scabies cases.

Child Life Protection

PUBLIC HEALTH ACT, 1936.

SECTIONS 206—220.

(a)	Number of persons who were receiving children for reward at the end of the year	1
(b)	Number of children on the register at the end of the year	1
(c)	Number of Child Protection Visitors at the end of the year who were Health Visitors	6

Nursing Homes

PUBLIC HEALTH ACT, 1936.

SECTIONS 187—195.

The Lancashire County Council have delegated their powers under the above Act to the Ashton-under-Lyne Borough Council, who are the supervising authority for this purpose.

There is one Nursing Home registered in the Borough at:—
24, Villiers Street.

This Maternity Home was closed by the Council as a result of failure of the Matron to maintain the Institution up to the standards of staffing and accommodation required by the Authority.

The closure took effect on 31st May, 1946.

Housing Statistics

Number of new houses erected during the year:—

(i)	By the Local Authority	15
(ii)	By other Local Authorities	Nil.
(iii)	By other bodies or persons	69*

* Temporary.

1.—Inspection of dwelling-houses during the year:—

(1) (a) Total number of dwelling-houses inspected for housing defects (under Public Health or Housing Acts)	1155
(b) Number of inspections made for the purpose	2354
(2) (a) Number of dwelling-houses (included under sub-head (1) above) which were inspected and recorded under the Housing Consolidated Regulations, 1925 to 1932	254
(b) Number of inspections made for the purpose	263
(3) Number of dwelling-houses found to be in a state so dangerous or injurious to health as to be unfit for human habitation	9
(4) Number of dwelling-houses (exclusive of those referred to under the preceding sub-head) found not to be in all respects reasonably fit for human habitation	1146

2.—Remedy of defects during the year without service of formal notices:—

Number of defective dwelling-houses rendered fit in consequence of informal action by the Local Authority or their Officers	987
--	-----

3.—Action under statutory powers during the year:—

(a) Proceedings under Sections 9, 10 and 16 of the Housing Act, 1936:—

(1) Number of dwelling-houses in respect of which notices were served requiring repairs	Nil.
---	------

(2) Number of dwelling-houses which were rendered fit after service of formal notices:—

(a) By Owners	Nil.
(b) By Local Authority in default of Owners		—

(b) Proceedings under Public Health Acts:—

(1) Number of dwelling-houses in respect of which notices were served requiring defects to be remedied	54
(2) Number of dwelling-houses in which defects were remedied after service of formal notices		
(a) By Owners	49
(b) By Local Authority in default of Owners		Nil.

(c) Proceedings under Sections 11 and 13 of the Housing Act, 1936:—

(1) Number of dwelling-houses in respect of which Demolition Orders were made	7
(2) Number of dwelling-houses demolished in pursuance of Demolition Orders	—

(d) Proceedings under Section 12 of the Housing Act, 1936:—

(1) Number of separate tenements or underground rooms in respect of which Closing Orders were made	2
(2) Number of separate tenements or underground rooms in respect of which Closing Orders were determined, the tenement or room having been rendered fit	—

4.—Housing Act, 1936.—Part IV.—Overcrowding:—

(a) (i) Number of dwellings overcrowded at the end of the year	198
(ii) Number of families dwelling therein	212
(iii) Number of persons dwelling therein	1340

(b) Number of new cases of overcrowding reported during the year...	42
(c) (i) Number of cases of overcrowding relieved during the year	30
(ii) Number of persons concerned in such cases	160

Water Supply

The Water Supply has been satisfactory in quantity and quality. There has been filtration of all supplies. Chlorination at the Brushes and Yeoman Hey Filterhouses and Ozonisation at Knott Hill.

During the year 4 chemical and 165 bacteriological samples were taken, and the results returned were considered very satisfactory.

Inspection and Supervision of Food

MILK EXAMINATION.

Biological:	Methylene Blue	} 36 examinations.
	Phosphatase Test	

Out of the above 36 examinations, 25 were satisfactory and 11 unsatisfactory as regards the Phosphatase Test; 28 were satisfactory and 8 unsatisfactory as regards the Methylene Blue Test.

The Prevalence and Control over Infectious Diseases.

The cases of Infectious Diseases notified during the year were as follows:—

DISEASE	Total Cases at all Ages	Total Deaths	HOSPITAL	
			Total Cases removed to Hospital	Deaths in Hospital of persons belonging to district
Chicken Pox	147	—	—	—
Diphtheria and Membranous Croup	25	—	25	—
Erysipelas	12	—	1	—
Scarlet Fever	27	—	24	—
Enteric Fever (including Paratyphoid)	1	—	1	—
Puerperal Pyrexia	8	—	1	—
Cerebro-Spinal Meningitis	3	1	3	—
Ophthalmia Neonatorum	3	—	—	—
Acute Primary Pneumonia	54	30	—	—
Acute Influenzal Pneumonia	4	—	—	—
Pulmonary Tuberculosis	57	22	—	—
Other forms of Tuberculosis	11	2	—	—
Measles	136	1	2	—
Whooping Cough	175	—	3	—
Polio-Encephalitis	—	—	—	—
Polionmyelitis	—	—	—	—
Encephalitis Lethargica	—	—	—	—

HOSPITAL ACCOMMODATION

From 1st June, 1943, 11 beds, instead of 12, have been maintained at the Borough Hospital, Hyde.

The authorities of Oldham and Monsall have agreed to admit cases if there are beds available at the time.

The Ashton and District Smallpox Hospital at Hartshead is always held in readiness and any case of Smallpox could be admitted within an hour of notification.

DIPHTHERIA.

There were 25 cases of Diphtheria notified during the year.
There were no deaths.

Age distribution of the cases notified:—

SCARLET FEVER.

There were 27 cases (41 in 1945) notified. The disease was mild and there were no deaths.

PNEUMONIA.

There were 54 cases of Acute Primary Pneumonia notified (35 in 1945) and 4 cases (3 in 1945) of Acute Influenzal Pneumonia.

Influenza is not notifiable unless complicated with Pneumonia.

ASHTON AND DISTRICT SICK NURSING ASSOCIATION.

501 visits were made to 128 cases of Pneumonia by the Nurses from the Ashton and District Sick Nursing Association.

SUMMARY OF NOTIFIED CASES NURSED DURING 1946

(JANUARY 1st to DECEMBER 31st).

I am indebted to the Matron of the Ashton-under-Lyne District Nursing Association for the following figures of work which they have carried out during the year 1946.

	Cases.	Visits.
Lobar Pneumonia	50	201
Influenzal Pneumonia	16	58
Measles	12	100
Infantile Paralysis	—	—
Broncho-Pneumonia	50 128	142 = 501

Children under five—

Chicken Pox	6	42
Whooping Cough	7	89
Infantile Diarrhœa	10 = 23 (inc. no.)	96 = 227
Circumcision (Minor Ops.)	56	146
Skin Diseases in Children	9 = 65 (inc. no.)	46 = 192
	<hr/> 216 <hr/>	<hr/> 920 <hr/>

Venereal Disease

Public Health (Venereal Diseases) Regulations, 1916.

The Lancashire County Council, who administer these regulations, have a treatment centre at the Ashton-under-Lyne District Infirmary.

The following shows the work carried out at the Venereal Diseases Clinic at the Ashton-under-Lyne District Infirmary during the year 1946:—

Patients under treatment at 1st January, 1946 ...	159
New cases admitted during 1946	250
Total attendances	3732
Patients receiving treatment at the end of 1946 ...	163
Pathological examinations for V.D. patients ...	1089
Patients reporting for continuation tests	54

Of the 250 new cases admitted during the year, 101 were Ashton residents. There is an increase in the incidence of Venereal Disease in the area due to war conditions; the position is being very closely watched. There were 96 cases found not to be V.D.

Penicillin is available for specified cases. Service cases are now reporting for continuation tests in fair number.

Scabies

The Scabies Clinic is held at the Disinfection Station, Town's Yard.

This building was originally constructed for the disinfection of Smallpox contacts, and is suitable for treating cases of Scabies. There is a Waiting Room, Bath Room, Treatment and Dressing Room and a Discharge Room. Clothes for stoving are passed through a revolving cupboard in the bathroom to the disinfectant next door.

Treatments by appointment are given on Monday, Tuesday, Thursday and Friday—women and children in the mornings and men in the afternoons. A following-up Clinic is held at the School Clinic every Wednesday morning, when cases are seen by the Medical Officer.

The Health Visitors—School Nurses treat the women and children and a male attendant treats the men.

The treatment given is a bath, followed by an application of Benzyl-Benzoate Emulsion. Each patient is told to bring a change of clean clothes. Typewritten instructions are given regarding clothing and other necessary precautions. The local doctors have been notified of these arrangements.

Fresh sources of infection come into the town from time to time. By careful following up of contacts to known cases, and by treating whole families the infection has been kept down. In difficult cases, and particularly when re-infection occurs, action has been taken under the Scabies Order, 1941—to ensure the medical examination and treatment of contacts.

In dealing with this infection the Nurses have paid many day and evening visits to the homes.
